Dear Mr. Countryman,

I am writing you today in support of the Point Wells project as proposed. Looking at their current project, and the work that they've done to redress issues that Snohomish County has raised, including adding a 2nd roadway with access, I'm in full support of this project.

The only question that remains is Sound Transit getting on board with what would be a perfectly placed station. I'd like to also remark that Woodway residents would have very easy access to that station, should it be built, and it would greatly benefit the community.

it would also push development further south into Snohomish county and create a new Urban Hub as well as a great spot for tourism.

Kind regards,
Sean
